SARGENT®

ASSA ABLOY

MicroShield®

As part of their promise to provide innovative solutions to their customers, certain ASSA ABLOY Group brands offer the MicroShield® technology, a silver-based antimicrobial coating designed to inhibit the growth of bacteria. MicroShield® is a registered trademark of Yale Security Inc., an ASSA ABLOY Group company.

MicroShield® Coating

- Revolutionary finish coating available on all SARGENT product lines, utilizes a silver-based antimicrobial compound from Agion Technologies
- As an integral part of the finish coating, MicroShield lasts for the life of the hardware
- MicroShield coating permanently suppresses the growth of bacteria, algae, fungus, mold and mildew. It is effective against a broad spectrum of bacteria.
- Non-toxic and completely safe. The Agion antimicrobial compound is EPA and NSF approved and FDA listed for use in medical and food preparation equipment.
- Applications: Anywhere there is need for a clean environment (hospitals, laboratories, schools, medical centers, daycare, food processing etc.)

Agion has achieved:

Agion's silver antimicrobial has been certified for its material content, recyclability, and manufacturing characteristics. Cradle To Cradle Certified^{CM} products meet established standards for human health, environmental health and recyclability.

Cradle To Cradle Certified^{CM} is a certification mark of MBDC.

ASSA ABLOY, the global leader in door opening solutions

Introduction & Features

Multi-Point Auto Deadlocking Systems

SARGENT FM7100 and FM6100 are multi-point auto deadlocking systems developed to help protect lives while securing a community shelter and safe room entry. Sturdy heavy-duty steel components firmly secure the door or storm shutter within the frame - at top, bottom and center latch points - securing the opening during a windstorm event. The FM7100 is UL approved for both FEMA 361 and 320 applications and the FM6100 is UL approved for both FEMA 361 and ICC500. These locking systems will withstand severe wind speeds and flying debris. This FM7100 series is available for windstorm applications also. These devices consist of concealed vertical rods with top and bottom latching complemented by an automatically projecting deadbolt at the center of the door. The device is operated by dual mounted EC controls (similar to the 80 Series ET Controls).

The EC control operates by pushing the top bolt out of the door or storm shutter and into the frame while retracting the bottom bolt and deadbolt simultaneously. Once retracted the bolts are held in position as the door/storm shutter swings. As the locking system closes, the hold back feature engages the frame: all bolts project simultaneously. Once secured, the occupants are protected against threatening conditions.

EC controls are available with a variety of functions which include classroom, passage and passage x blank plate. All FM7100 devices are fire rated and can be used on fire rated doors (4' x 8').

The FM7100 & FM6100 Series are heavy-duty multi-point auto deadlocking systems joining the SARGENT line of multi-point door security devices including:

- The Triad Multi-Point Mortise Lock which includes two hook bolts
- Center & Top Latching Exit Devices which incorporate a mortise lock and top latching vertical rods with the choice of concealed or surface mounted
- And the MP7000, two point latching system with dual mounted ET Controls with the option of less bottom rod

Note: Any retrofit or other field modification to a fire rated opening can potentially impact the fire rating of the opening, and Sargent Manufacturing Company makes no representations or warranties concerning what such impact may be in any specific situation. When retrofitting any portion of an existing fire rated opening, or specifying and installing a new fire-rated opening, please consult with a code specialist or local code official (Authority Having Jurisdiction) to ensure compliance with all applicable codes and ratings.

Innovation

- Unique and robust multi-point auto deadlocking system engineered to help save lives

FM7100

- Integrated with the CECO StormPro® 361, CURRIES StormPro® 361, FLEMING BARON F-5 doors and frames and McKINNEY hinges provides an opening meeting FEMA guidelines for:
 - FEMA 320 (residential safe rooms design and construction)
 - FEMA 361 (building community shelters design and construction for tornado and hurricane protection)
- For Windstorm Certifications, see page 9

FM6100

- Fully integrated - FM6100 is part of a complete ASSA ABLOY severe windstorm solution utilizing CECO StormPro® 361, CURRIES StormPro® 361, Fleming F-5 shutters and frames and McKINNEY® hinges
- UL approved to FEMA 361 & ICC 500 for inswing shutters 1'8" w x 3'0" h minimum to 4'0" w x 6'8" h maximum.

Applications

- Perfect for community refuge areas - where people seek protection from strong wind events
- Community shelters and safe rooms, corporate campuses, schools, healthcare facilities and government facilities

Strength & Durability

- UL 3-hour fire rating (FM7100 only)
- Extra-heavy duty steel components automatically secure the door to the frame
 - In multiple locations: top, bottom and center latch points
 - Fortifies opening to withstand extreme wind speeds and flying debris
- Heavy duty escutcheons standard
- Fortified with high tensile alloy Holo-Krome® fasteners
- Through-bolts on door for solid attachment

Features

All latching points activate automatically when door is closed and retract with one single motion upon exit

- Both inswing and outswing applications
- Solid cast levers

Three functions available:

- Classroom
- Passage
- Passage Lever x Blank Plate (for shutter applications)

- Seven year limited warranty

FM7100 Specifications

Multi-Point Auto Deadlocking Systems

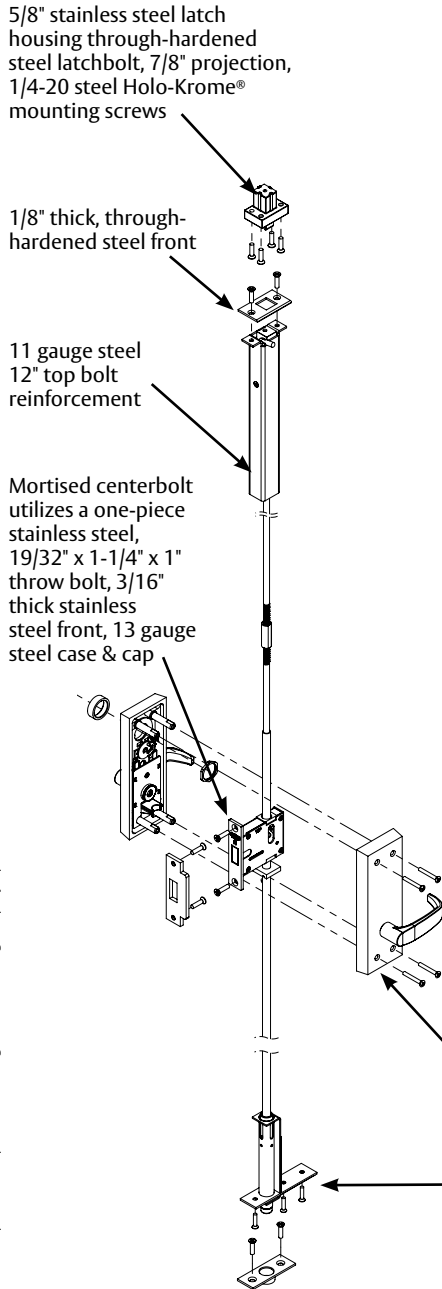

Features

- FM7100 integrated with CECO StormPro® 361, CURRIES StormPro® 361 and FLEMING BARON F-5 doors and frames and McKINNEY hinges provide a multi-point auto deadlocking system
- Meets FEMA 320 and FEMA 361 Guidelines for both inswing and outswing doors
- Concealed rods offer additional security
- All functions determined by outside trim

Specifications

For Doors	1-3/4" thick door only; Fully integrated – FM7100 is part of a complete ASSA ABLOY windstorm solution utilizing CECO StormPro® 361, CURRIES StormPro® 361, FLEMING F-5 doors and frames and McKINNEY® hinges
Mounting	Supplied fasteners are for metal doors with through-bolts for trim
Hand	Handed; specify RHR, LHR, RH or LH
Top Bolt	Hardened steel with 7/8" projection in a 5/8" stainless steel housing projecting from the frame
Bottom Bolt	Steel 3/4" diameter with 3/4" projection with 1/8" steel plate
Center Bolt	One-piece stainless steel, 19/32" x 1-1/4" x 1" throw
Lock Front	1-1/8" x 4-7/8" x 3/16" thick stainless steel, one piece
Center Bolt Strike	1/4" thick stainless steel
Backset	2-3/4" standard
Door Thickness	1-3/4" standard
Door Height	Two adjustable ranges available: 6'8" - 8'0" & 5'6"-6'8" Meets FEMA 320 and FEMA 361 Guidelines for both inswing and outswing doors
Maximum Opening	Single door 4'0" x 8'0" and double doors 8'0" x 8'0"
UL Fire Listed	All FM7100 are UL Listed
Trim	EC trim with Standard, Coastal Series or Studio Collection levers
Functions	- Classroom - Passage - Passage Lever x Blank Plate (for shutter applications)
Cylinder	#41 Mortise Cylinder

Note: For UL & Florida Certifications see page 9

DOOR HANDS DETERMINED FROM OUTSIDE OF DOOR OR SECURED SIDE

FM6100 Specifications

Multi-Point Auto Deadlocking Storm Shutter

5/8" stainless steel latch housing through-hardened steel latchbolt, 7/8" projection, 1/4-20 steel Holo-Krome® mounting screws

1/8" thick, through-hardened steel front

11 gauge steel 12" top bolt reinforcement

Mortised centerbolt utilizes a one-piece stainless steel, 19/32" x 1-1/4" x 1" throw bolt, 3/16" thick stainless steel front, 13 gauge steel case & cap

1/8" steel reinforcement plate
3/4" steel nylon coated lower bolt, 3/4" projection

Features

- FM6100 is part of a complete ASSA ABLOY severe windstorm solution utilizing CECO StormPro® 361, CURRIES StormPro® 361, FLEMING F-5 shutters and frames and McKINNEY® hinges
- Meets FEMA 361 and ICC 500 for inswing shutters
- Concealed rods offer additional security
- All functions determined by outside trim

Specifications

For Shutters	1-3/4" thick Shutter only; Fully integrated – FM6100 is part of a complete ASSA ABLOY windstorm solution utilizing CECO StormPro® 361, CURRIES StormPro® 361, FLEMING F-5 shutters and frames and McKINNEY® hinges
Mounting	Supplied fasteners are for metal doors with through-bolts for trim
Hand	Handed; specify RH or LH, see chart below
Top Bolt	Hardened steel with 7/8" projection in a 5/8" stainless steel housing projecting from the frame
Bottom Bolt	Steel 3/4" diameter with 3/4" projection with 1/8" steel plate
Center Bolt	One-piece stainless steel, 19/32" x 1-1/4" x 1" throw
Lock Front	1-1/8" x 4-7/8" x 3/16" thick stainless steel, one piece
Center Bolt Strike	1/4" thick stainless steel
Backset	2-3/4" standard
Shutters Thickness	1-3/4" standard
Shutters Height	Two adjustable ranges available: 3'0"- 4'6" & 4'6"-6'8" Meets FEMA 361 and ICC 500 for inswing shutters
Shutter Width	1'8" minimum to 4'0" maximum width
Trim	EC trim with Standard, Coastal Series or Studio Collection levers
Functions	- Classroom - Passage - Passage Lever x Blank Plate (standard)
Cylinder	#41 Mortise Cylinder

Functions and Descriptions

Multi-Point Auto Deadlocking Systems

FM7100 & FM6100 Series:
Available Functions and
Designations

How to Order	Outside EC Function			Inside EC Function	
Product Designation	SARGENT Function Numbers	Outside Function Description		SARGENT Function Numbers	Inside Function Description
FM7113 FM6113	13	<ul style="list-style-type: none"> • Multi-point auto deadlocking system • Multi-point latch retraction by lever either side, unless outside lever is locked by key outside • Inside lever always free 		15	Classroom
FM7115 FM6115	15	<ul style="list-style-type: none"> • Multi-point auto deadlocking system • Multi-point latch retraction by lever either side • Both levers always free 		15	Passage Only (No cylinder)
FM7101 FM6101	01	<ul style="list-style-type: none"> • Multi-point auto deadlocking system • Multi-point latch retraction by inside lever • Lever on one side, blank plate on the other • Lever always free • For inswing window storm shutters 		15	Inside Passage

Note: Product designation is determined by function of outside trim. The inside trim is always 15 function, which allows for free egress. Function combinations not shown may be available as a special. Consult factory.

EC Trim, Finishes, Standard & Coastal Series Levers

Multi-Point Auto Deadlocking Systems

EC Lever Controls

The trim for the FM7100 and FM6100 is the EC Control which mounts on each side of the door. The outside EC Control determines the function of the entire device. The inside EC Control provides a passage function. Easy operating lever handle allows convenient one hand operation. Decorative Coastal Series Levers and Studio Collection levers are available. All levers are brass. For stainless steel levers consult factory.

Finishes

Windstorm: UL & Florida Certifications

Multi-Point Auto Deadlocking Systems

SARGENT Manufacturing offers a wide variety of products that meet building codes requiring hurricane, windstorm and FEMA certifications. SARGENT products are tested to meet the requirements of the most severe building codes as specified by the Florida Building Code, Miami Dade Code Requirements and in the International Building Code. Listed below are certifications and the standards met by the FM7100 Multi-Point Auto Deadlocking System.

UL Listed:

ANSI/SDI-BHMA A250.13	"Testing and Rating of Severe Windstorm Resistant Components for Swinging Door Assemblies."
ANSI/ASTM E330-2002	"Standard Test Method for Structural Performance of Exterior Windows, Doors, Skylights and Curtain Walls by Uniform Static Air Pressure Difference"
ANSI/ASTM E1886-2005	"Standard Test Method for Performance of Exterior Windows, Curtain Walls, Doors, and Impact Protective Systems Impacted by Missile(s) and Exposed to Cyclic Pressure Differentials"
ASTM E1996-2009	"Standard Specification for Performance of Exterior Windows, Curtain Walls, Doors and Impact Protective Systems Impacted by Windborne Debris in Hurricanes"

Testing Application Standard

(TAS) 201-1994	"Impact Test Procedures"*
(TAS) 202-1994	"Criteria for Testing Impact and Non Impact Resistant Building Envelope Components Using Uniform Static Air Pressure"*
(TAS) 203-1994	"Criteria for Testing Products Subject to Cyclic Wind Pressure Loading"*

* published in the "Florida Building Code"

Note: FM7100 is certified & labeled for US markets and CN7100 is certified & labeled for Canadian Markets. The products are identical products except for the labeling.

Note: For 1-3/4" thick doors only.

* Function designation is determined by function of outside trim

** Auto deadlocking systems are available in two height ranges 5'6" - 6'7" and 6'8" - 8'0"; SARGENT will supply the correct range based on opening height specified

FM7100 Series Fortified Multi-Point Auto Deadlocking System

Three-Point Locking System Devices: Three-Point, auto deadbolt locking devices are engineered for use on inswing and outswing door applications at windstorm safe shelter room locations. Concealed, fortified steel construction secures the door to the frame at top, bottom and center latching positions. All three latching points shall be automatically activated when the device is closed and retracted with one single motion upon exiting.

1. The Three-Point locking system device is part of an integrated door, frame and hardware assembly UL-approved to both FEMA 361 and FEMA 320 guidelines for both inswing and outswing doors.
2. Units shall be manufactured in compliance with NFPA 80 and NFPA 101 life-safety requirements and approved for usage on up to 3-hour, UL10b or 10c fire rated openings.
3. Latchbolt Construction:
 - a. Mortised Centerbolt: Single piece, 13 gauge chrome plated steel lockcase with 3/16" thick stainless steel front. Stainless steel, 1" throw deadbolt. 2-3/4" backset standard with 1/4" stainless steel centerbolt strike.
 - b. Top Latch: Through-hardened steel latchbolt with 7/8" projection, 1/8" steel latchbolt front, and 5/8" stainless steel latch housing secured with 1/4-20 Holo-Krome® fasteners.
 - c. Bottom Bolt: 3/4" diameter steel nylon coated bolt with 3/4" projection and 1/8" steel reinforcement plate. Brass strike housing secured with 1/4-20 Holo-Krome fasteners.
4. Provide devices with heavy-duty, brass escutcheon trim and solid cast levers matching the design style and architectural finishes as the balance of the lockset and latches specified.
