

## 660 Series Mini Station Control

### Overview

The 660 Series Mini Station Control is designed for concealed desk application, and it is used to release an electric or electronic locking mechanism from a remote location. The 660 Series Mini Station Control is mounted in a mini aluminum box, 2" x 2" x 1". The 660 is available with a momentary action pushbutton or maintained action toggle switch. Both can be surface mounted. A typical application is under a desk to release an entrance door.

### Features and Benefits

- Surface mount application
- Choice of maintained or momentary action
- Compact size
- Recommended for concealed desk application
